

Stéphanie Antoine

Experience

Stéphanie joined the team in early 2000, having a previous experience in an accounting firm.

Stéphanie specializes in private equity transactions, and has a sound experience in reviewing all types of agreements relating to these transactions (in particular, she finds interesting to deal with the organisation of the rights and obligations of the different groups of shareholders, and with all the types of guarantees to be negotiated between the parties).

She also specializes in UK law group structuring projects, which she has implemented for a significant number of clients.

Since the issuance of the SICAR bill in 2004 (regulated vehicle for risk capital investment), she has also developed an expertise in this new field by being involved in transactions implementing such a structure.

Generally, she enjoys working for challenging files requiring technical legal skills and an innovative approach.
